

Thank you for purchasing the AA Battery Holder. We certainly hope you are pleased with your purchase. We have a few suggestions that will increase the functionality of this product. If you have any questions, please go to www.angelheartwoodworking.com !

- ❖ If your sliding top becomes too loose or too tight, simply apply some water softened household bar soap to the grooves (wood will expand and shrink with varying humidity levels so you might want to do this immediately).
- ❖ It is important to keep the interior of this Battery Holder clean and free from dust and debris
- ❖ Keep the Battery Holder from the elements (i.e. do not leave in the sun for long periods of time or allow the Battery Holder to sit out in the rain)
- ❖ If your Battery Holder becomes dull and scratched, buffing with #0000 steel wool may restore the original sheen.
- ❖ If you have any specific problems with this product please contact me at:
steven@angelheartwoodworking.com.

Thank You and Enjoy !
